

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	18 October 2022
Team ID	PNT2022TMID06114
Project Name	Project – Industry-Specific intelligent Fire Management System
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Requirements	Workers and Product Protection Automatic Sprinkler System Monitors Smoke ,Gas and Temperature
FR-2	User Registration	Manual Registration Registration through webpage Registration through Form Registration through Gmail
FR-3	User Confirmation	Confirmation via Phone Confirmation via Email Confirmation via OTP
FR-4	Payment Options	Cash on Delivery Net Banking/UPI Credit/Debit/ATM Card
FR-5	Product Delivery and Installation	Door Step delivery Take away Free Installation and 1 year Warranty
FR-6	Product Feedback	Through Webpage Through Phone calls Through Google forms

Non Functional Requirements:-

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Have a clear and self-explanatory manual. Easier to use. Easily accessible by everyone.
NFR-2	Security	Are inspected monthly by the Fire Alarm Technician. Inspected and tagged by a contractor annually.

NFR-3	Performance	The equipment must have a good user interface It should have a minimal energy requirement It has to save lives of people and things
NFR-4	Availability	All the features will be available when the user requires. It depends on the need of the user and the customization of the user has done.
NFR-5	Scalability	The product has to cover all the space of industry irrespective of the size or area.

Types of requirements

BABOK, which is a recognized set of business analysis industry standards, offers the following classification of requirements.

Business requirements

These include high-level statements of goals, objectives, and needs. [Business requirements](#) do not include any details or specific features. They just state the problem and the business objective to be achieved such as

- increased revenue/throughput/customer reach,
- reduced expenses/errors, □ improved customer service, etc.

Solution requirements

Solution requirements describe specific characteristics that a product must have to meet the needs of the stakeholders and the business itself. They fall into two large groups.

- **Functional requirements** define what a product must do, what its features and functions are.

- **Nonfunctional requirements** describe the general properties of a system. They are also known as *quality attributes*.
